

RESIN SOFTENER

BB WATER

Softening plant is designed to softened the water i.e. To remove the hardness from the water by removing calcium & magnesium by exchanging the ion in water by using ion exchange resin i.e. Cation exchange.

Softening plant is available in Manual as well as PLC based control system with Fully automatic option.

Reverse Osmosis(RO) is a modern proces technology to purify water for a wide range of applications, including semi conductors, food processing BIO-Technology, Pharmaceuticals, Power generation sea water desalting and municipal drinking water.

COMMERCIAL RO PURIFIER

Specification:

- Capacity 250 to 2000 LPH
- Pre Treatment 64 FRP Vessel
- Micron filter
- R.O Membrane
- High Preessure Pump
- Automatic Control Panel
- Fully Stainless Steel Skid
- SS/CPVC/UPVC Pipe line
